4. Law. An instrument in writing (which for this purpose includes printing or other legible representation of words on parchment or paper), purporting to effect some legal disposition, and sealed and delivered by the disposing party or parties.

Signature to a deed is not generally required by English law, but is practically universal; and in most jurisdictions outside England where English law or legal forms prevail, signature has been substituted for or made equivalent to sealing. Delivery (q.v.) is now a moribund formality. Contracts of most kinds, as well as dispositions of property inter vives, may be made by deed, and in common practice are often so made.

† 3. Deficient cause: that 'deficience', failure to act, or absence of anything, which becomes the cause or negative condition of some result. Obs.

The conception and the phrase (causa deficient) appear first in St. Augustine, in his discussion of the origin of evil and of God's relation to it, and are connected with his doctrine that evil being nothing positive, but merely a defect, could have no efficient, but only a deficient cause. It was also used by Thomas Aquinas (who distinguished the physical sense of the phrase from the moral); in English it came into vogue during the Calvinistic Arminian controversy in 16-17th c., in reference both to the origin of evil and to the reprobation of the wicked. Cf. Defective a. 6. [Sr. August. De Cr. He says. he found it different both from reflexion, and refraction. This is the same property which Sir Isaac Newton calls Inflection. 1796 BROUGHAM in Phil. Trans. LXXXVI. 228 Def. 1. If a ray passes within a certain distance of any body, it is bent inwards; this we shall call Inflection. 2. If it passes at a still greater distance it is turned away; this may be termed Deflection. 1808 J. Webster Nat. [The word has all the appearance of being of F. origin, but no equivalent OF. defier has yet been recorded, nor is it clear what the etymology of such a form would be. Phonologically, it might answer to L. defacare, deflectre (see Defectare); but the sense offers difficulties. It has been suggested, however, that if 1b were the starting-point, it might conceivably answer to a late L. defacare stomachum (cf. dissolvere stomachum Pliny). But the sense-development remains uncertain, and the order here followed is provisional. It may be that 'dissolve' was the primary sense.]

The native repr. of L. delicatus in OF. was delice 'fine, slender, delicate': see DELIE.

(The etymology of L. delicatus appears to be quite uncertain: several distinct suggestions are current. Even the primary sense is doubtful; but, if not originally connected with delicitus (DELICA), it seems to have been subsequently associated therewith. The word had undergone considerable development of meaning already in ancient Latin; in Romanic it received further extension in the line of meaning 'dainty, tenderly fine, slender, slight, easily affected or hurt'; these Latin and Romanic senses have at various times been adopted in English, often as literal adaptations of the Latin word in the Vulgate, etc.; and the history of the word here is involved and difficult to trace. The following arrangement is more or less provisional.)]

Florence in 1582, mainly with the object of sifting and purifying the Italian language; whence its name, and its emblem, a sieve.

The first edition of its Dictionary, the Vocabolario degli Accademici della Crusca, appeared in 1612, and the fourth, 1720-38, has long been considered as the standard authority for the Italian language. A new edition on more historical lines was begun in 1881.

Cange).

The transition from the Latin sense 'give in charge, entrust, commit, commend' to the Romanic sense 'request, ask,' was probably made through the notion of entrusting or committing to any one a duty to be performed, of charging a servant, or officer, with the performance of something, whence of requiring its performance of him, or authoritatively requesting him to do it. Hence the notion of asking in a way that commands obedience or compliance, which the word retains in English, and of simple asking, as in French. An indirect personal object (repr. the L. dative) would thus be a necessary part of the original construction, but it had ceased to be so before the word was adopted in England, where the earliest use, both in Anglo-Fr. and English, is to demand a thing simply. The verb probably passed into the vernacular from its legal use in Anglo-French.]

I. Possession.

[In Germanic, including English, law, the primary idea in relation to property is possessiom, not counsership (= Roman dominium), as we now understand it. Hence, derivatives of L. dominium and proprietas became in mediaval law chiefly or even exclusively associated with possession. (Sir P. Pollock.)]

Chiefly in the phrase to hold in demesne (tenere in dominico), i.e. in one's own hands as possessor by free tenure. (Formerly sometimes in pl. by confusion with senses in II.)

Applied either to the absolute ownership of the king, or to the tenure of the person who held land to his own use, mediately or immediately from the king. Opposed to 'to hold in service' (tenere in servicio): if A held lands, immediately or mediately of the king, part of which he retained in his own hands, and part of which were in turn held of him by B, he was said to hold the former 'in demesne', and the latter 'in service'. B, in his turn, might hold his portion wholly 'in demesne', or partly also 'in service' by admitting a tenant under him. In every case, the ultimate (free) holder, 'the person who stands at the bottom of the scale, who seems most like an owner of the land, and who has a general right of doing what he pleases with it, is said to hold the land in demesne'. Prof. F. W. Maitland.

janah, damajanah, etc. in 19th c. lexicons. The current Eng. form is the result of popular perversion as in 'sparrow-grass'; the earlier demijan, demijean, approach more closely to the F. and Romanic, whence the word was adopted. The original nationality and etymology of the word are disputed: see Rev. A. L. Mayhew in Academy 14 Oct. 1893. Some have assumed the Arabic to be the source of the Romanic forms, and have sought to explain this as of Persian origin, and derived from the name of the town of the Romanic forms, and have sought to explain this as of Persian origin, and derived from the name of the town Damghān or Damaghān, (Like), a commercial emporium S.E. of the Caspian. But this is not supported by any historical evidence; moreover, the word does not occur in Persian dictionaries, nor in Arabic lexicons before the 19th c., and the unfixedness of its form (dāmijānaā, dāmaghānaā, damanjānaā), points, in the opinion of Arabic scholars, to its recent adoption from some foreign language, probably from Levantine use of It. damigiana. Assuming the word to be Romanic, some have taken the Provencal and Catalan forms as the starting-point, and conjectured for these either a L. type \*dimidiāna\* from dimidiām half (Alart in Rev. Lang. Rom. Jan. 1877), or the phrase dē mediāna of middle or mean (size) (in illustration of which Darmesteter cites from a 13th c. tariff of Narbonne the phrase 'ampolas de mieja megeira '= L. ampullāts dē mediā mensūrā). But these suggestions fail to explain the initial da-prevalent in all the langs.; on account of which M. Paul Meyer (like Littre) thinks that all the Romanic forms are simply adaptations or transliterations of the French, this being simply Dame Jeanne 'Dame Jane', as a popular appellation (cf. Bellarmine, greybeard, etc.). This is also most in accordance with the historical evidence at present known, since the word occurs in French in the 17th c., while no trace of it equally early has been found elsewhere.]

First mentioned (so far as known) by the Scholiast (Lactantius or Lutatius Placidus, γε 450) on Statius Theo. 1. 2.16, as the name of the great nether deity invoked in magic rites. Mentioned also by a scholiast on Lucan Pharzalia v1. 742. Described in the Refertorium of Conrad de Mure (1273) as the primordial God of ancient mythology; so in the Gemalogia Deorum of Boccaccio. The latter appears to be the source of the word in modern literature (Ariosto, Spenser, Milton, Shelley, etc.).

[By some supposed to be a corruption of δημιουργός Demiurgus; but this is very doubtful. (Chiefly in references to the so-called 'dæmon of Socrates'. Socrates himself claimed to be guided, not by a δαμώνον or dæmon, but by a δαμώνονο, divinsum quiddam (Cicero), a certain divine principle or agency, an inward monitor or oracle. It was his accusers who represented this as a personal dæmon, and the same was done by the Christian Fathers (under the influence of sense 2), whence the English use of the word, as in the quotations. tianity. Aauhova is used several times by the LXX to render D'Th' shèdim 'lords, idols', and D'Thy shedim 'hairy ones' (satyrs or he-goats), the latter also rendered haraa 'vain things'. It is also frequent in the Apocrypha (esp. in Tobit), and in the N.T., where in one instance (Matt. viii. 31) Bauhove occurs in same sense. In the Vulgate generally rendered damonium, pl. ia, but once in O. T. (Lev. xvii. 7), and in to places in N.T. (8 in St. Matthew) damon, pl. is. These words are indiscriminately translated deojo! in the Ags. Gospels, feend or deni! in Wyclif, and in all the 16-17th c. versions devil; the Revisers of 1881-5 substitute demons in Deut. and Psalms, but in the N. T. retain devil, s., in the text, with the literal translation demon, s., in the margin. Quite distinct from this is the word properly translated 'Devil', b. depolos, which is not used in the plural. It is owing to this substitution of devil in the Bible versions, that demon is not found so early in this, as in the popular sense b, which arose out of this identification. 1705 PHILLIPS (ed. Dene-hole, Dane-hole (dr'n-, dr'n+hol).

Also 9 Danes' hole. [app. from the national name Dane, Danes, ME. Dene, OE. Dene + HOLE.

There is no doubt that this is popularly and traditionally the local interpretation of the name: see the first quot. In various parts of the country, eg. the country of Durham, other ancient caves and excavations are attributed to the Danes, and called Danes' holes or Dane-holes. It is not quite certain that dene-hole is a genuine popular form any-

where; but if so, it may possibly represent a ME. Dene-holle:—OE. Dena-hol, Danes' hole (cf. OE. Dena-lagu, ME. Dene-lawe, mod. Danes' law, Dane-law), or it may be merely a local pronunciation. But it has suggested to recent writers connexion with Dena sb., or with other of the sbs. so spelt, or with Den (which is phonetically impossible); and either on this account, or because it does not countenance any theory about the Danes, it has been generally adopted by the archeologists who have investigated these holes since c 1880. Some have very reprehensibly shortened the name dene-hole into dene, conformably to their erroneous conjectures as to its connexion with dene and den.]

of 60 or 80 feet, and there widening out horizontally into one or more chambers. Their age and purpose have been the theme of much discussion.

They are mentioned (but not named) by Lambarde 1570, by Camden 1605 as \*nite\*, in Plot's Oxfordshire, 1705, as 'the Gold-mine of Cunobelline, in Essex', and described in a letter from Derham to Ray 17 Feb. 1706. On its introduction to the West Indies from Africa in 1827, the name was, in Cuba, popularly identified with the Spanish word dengue 'fastidiousness, prudery'. In this form it was subsequently adopted in the United States, and eventually in general English use.

In the British West Indies, called by the Negroes dandy. b. spec. One of the separate divisions or branches

b. spec. One of the separate divisions or branches of state or municipal administration.

In the U.S. the word is used in the titles of the great branches of administration, of which there are eight, the Departments (Depts.) of State (orig. Foreign Affairs), War, Treasury, Navy, Post-office, Justice, Interior, and Agriculture. The Dept. of Labour is subordinate to that of the Interior.

In Great Britain, the great departments of State are not so named titularly, but the word is used in naming subdivisions or branches of these, e. g. the Factory Dept., and Prisons Dept. of the Home Office, and for certain other branches of administration as the Paymaster General's Dept., Science and Art Dept., Exchequer and Audit Dept., etc.; also in the Gas, Water, Electric Lighting, Transways, and other Departments of a municipal Corporation.

A. adj. Gram. Of verbs: Passive or middle in

form but active in meaning: originally a term of Latin Grammar. •

Latin Grammar.

Both form and meaning were originally reflexive (e. g. utor I serve myself, fruor I delight myself, proficisor I put myself forward, etc.), as in the Middle Voice in Greek; as, however, in ordinary verbs the reflexive form had become a passive in Latin, these verbs were erroneously regarded as having laid aside or dropped a passive meaning, whence the name. In reality, what was laid aside, or lost sight of, was the reflexive sense.

depositum: see DEPOSITUM, DEPOSIT, DEPOST, all forms of the same word.

As in the case of other words from modern French, the pronunciation varies widely. The French depo, with short e and o and undefined stress, is foreign to English habits of atterance. The earlier English rendering, as shown by the dictionaries down to 1860-70, was, according to the French historical stress and quantity, or the English conception of it (cf. bursan, chaleau, Tusand), dipo, or, with a conscious effort to reproduce the first vowel in French, deporties of the pronunciations are still heard, but the stress is now more usually on the first syllable, and the quantity of the odoubtful, giving depo, dipo, in England, dipo, dipo, in U.S. (where the word is much more in popular use, and dipot, dipot, are mentioned by Longfellow, Lowell, etc., as popular vulgarisms). The form depo comes as near the French depo as English analogies admit. The earlier Eng. spelling dipot belongs especially to the pronunciation dipot; the actual F. spelling dipot goes together with the attempt to pronounce as in French.]
